MEMO NOTES	
¹ <u>Breastmilk or Iron Fortified Infant Formula</u> : Breastmilk or iron fortified infant formula, or portions of both, must be served; it is recommended that breastmilk be served in place of iron fortified infant formula from birth through 11 months	
² <u>Breastfeeding On-Site</u> : In lieu of providing expressed breastmilk, a breastfeeding mother can breastfeed their infant on-site as part of a reimbursable meal. The child care center must document that the infant was breastfed, but documentation of duration and amount is not required.	
³ <u>Breastmilk Serving Size</u> : For some breastfed infants who regularly consume less than the minimum amount of breastmilk per feeding, a serving of less than the minimum amount may be offered, with additional breastmilk offered later if the infant will consume more.	
⁴ <u>Iron Fortified Infant Formula</u> : Iron fortified infant cereal may not be offered in a bottle.	
⁵ <u>Yogurt</u> : Yogurt must contain no more than 12 grams of added sugars per 6 oz.	
⁶ <u>Introduction of Solids</u> : A serving of solid foods in each component is required when the infant is developmentally ready to accept it. See the NC CACFP <i>Provision of Breastmilk or Infant Formula and Solid Foods</i> form for guidance.	
⁷ <u>Juice</u> : Vegetable/fruit juices must not be served.	
⁸ <u>Grains</u> : Grains must be whole grain rich, enriched meal, or enriched flour.	
⁹ <u>Breakfast Cereal</u> : Breakfast cereal must contain no more than 6 grams of added sugars per dry ounce.	
¹⁰ <u>Additional Components</u> : Extra components served with parent permission are not USDA reimbursable.	
¹¹ <u>Water is available throughout the day</u> : Infants older than 6 months may have small amounts of water (1-2 oz) with solid foods.	

* Infant menu must be followed to meet meal pattern requirements when an infant is developmentally ready. If an infant is not developmentally ready to consume what is stated on the menu, then accommodations and substitutions may be made to allow for infant's readiness level
